The Piusi Easyview 2.0 is the MCO2.0 version of the Easyoil nozzle. Attached to this manual nozzle, suitable for the delivery of a wide range of oils, there is a remote display that shows the amount transferred by the GPV2.0.

PERFORMANCE

ZIGBEE

CONNECTION SYSTEM

994 PSI

up to
7.8 GPM

FLOW RATE

TECHNOLOGY

The key to the dispensing system is the **clear dialogue between GPV 2.0 and the entire MCO 2.0 system**, plus the wireless communication between the GPV 2.0 solenoid valve and the Easyview nozzle. Optimized integration down to the tiniest detail.

ENHANCED ERGONOMICS

The nozzle **design** has been further improved

TECHNOLOGY

Easyview is a **more practical and intelligent nozzle**. The **large size display** shows the dispensing data transmitted on a wireless connection (zigbee) from the associated GPV 2.0. This means the nozzle no longer needs an internal flow meter, resulting in **significant weight reduction and less risk of damage**.

RUGGED CONSTRUCTION

High strength and performance are the core **properties** of the Easyview nozzle.
